GRADE SHEET FOR PRACTICE EXERCISE

(Page 50 in Study Skills Workbook)

It is very important to keep track of your grades for each grading period. This keeps you from being surprised by your final grade and gives you time to make study changes along the way to make improvement. On page 54 of your workbook, you can keep track of when the grading periods start and end for your school. This helps you know which grades fall in the current grading period.

For the practice exercise on page 50, write the grades in the grade column for each category and calculate the overall grade for the pretend assignments listed below. There are scores for each of the categories listed in the practice exercise: Tests, Quizzes, Projects and Homework.

To calculate your average for each category, add all the grades and divide them by the number of grades given. For example, if you have four grades, you would add all the grades and divide the total by four. *For this exercise you do not have to put a date or title in those columns but you would do this when listing your assignments at school.*
